

## UNIT – I : CYBER SECURITY

Cybercrime refers to illegal activities carried out using computers, networks, or the internet. A computer may be used as a tool or as a target of crime.

Challenges of cybercrime include anonymity, lack of jurisdiction, rapid technological growth, lack of user awareness, and difficulty in collecting digital evidence.

Cybercrimes are classified as crimes against individuals, property, organizations, and government.

Email spoofing involves forging the sender address to trick users into revealing sensitive information.

Spamming refers to sending bulk unsolicited messages. Internet time theft is unauthorized use of internet services.

Salami attack involves stealing very small amounts repeatedly so that the victim does not notice the loss.

## UNIT – II : CYBER SECURITY

Web jacking is the illegal takeover or control of a website by hackers.

Online frauds include banking fraud, credit card fraud, fake shopping websites, and lottery scams.

Software piracy is illegal copying or distribution of software without authorization.

Network intrusion is unauthorized access to a computer network using malware or password attacks.

Password sniffing captures passwords during transmission over a network.

Identity theft involves misuse of personal information. Cyber terrorism targets national security.

Session hijacking is taking control of a valid user session.

## UNIT – III : CYBER SECURITY

Cybercrime is handled under the criminal justice system through investigation, prosecution, and punishment.

The Information Technology Act, 2000 is the primary cyber law in India.

Hacking is unauthorized access to systems and networks.

Teenage web vandals commit cybercrimes out of curiosity or fun.

Cyber fraud includes online cheating and financial deception.

Defamation involves publishing false content that harms reputation.

Jurisdiction is a major issue because cybercrimes are borderless.

## UNIT – IV : CYBER SECURITY

The Indian Evidence Act, 1872 governs evidence in courts, while the IT Act, 2000 deals with electronic records.

Electronic records such as emails, SMS, and logs are legally admissible.

Section 65B of the Indian Evidence Act is mandatory for electronic evidence.

Admissibility depends on authenticity and integrity of data.

Probative value refers to the ability of evidence to prove facts.

Digital signatures ensure authenticity, integrity, and non-repudiation.

Electronic agreements and messages are legally valid.

## UNIT – V : CYBER SECURITY

Cybercrime laws in India are governed by IT Act 2000 and its 2008 amendments.

Global cooperation is required to fight cybercrime.

The IT Amendment Act 2008 introduced sections on identity theft and cyber terrorism.

Cyber ethics promote responsible and moral use of the internet.

Intellectual Property Rights protect software and digital content.

CERT-In is India's nodal cyber security agency.

Cyber security awareness reduces human errors and cyber risks.
